

(NAB) is trying to limit the content of XM radio, and other satellite radio providers. The latest additions of traffic and weather are of great value to me, and are one of the services that NAB is lobbying to stop. This is service I have elected to pay for due to the variety of content. In my occupation of merchandising, I spend much time traveling, here in the great Northeast. The ability to travel from state-to-state and have uninterrupted media is awesome. The lack of commercials is another reason I made the switch from free broadcast radio. Please convey my expressed interest in keeping satellite radio content, the public's choice, and not that of the NAB. Thank you in advance for taking the time to hear my view on this issue.  
Oppose HR 4026 & NAB's petition 04-160!

Sincerely,  
Stephen M. Smith
